occurrence/\$2 aggregate/\$2m products completed operations.

Capability

We have a variety of capabilities: Facilities Management, Grounds Maintenance and Custodial Services at large facilities.

Our grounds maintenance management team is experienced in airfields, national cemeteries, and large VA Medical Centers.

Supply Chain Management houses an internal consulting firm that specializes in teaming and joint venturing on large projects and that gives us an advantage in overcoming any gaps in capability to perform on certain PWS'.

As the lead partner in Veterans Landscape JV, our capabilities extend to specializing in tree trimming and removal, landscaping, irrigation installation and repair, lawn care and treatment for the VA National Cemeteries. At National Cemeteries, we protect and enhance the natural terrain with a team of certified arborists and horticulturists. The relationship with our consulting side is so important because we train our crews in not only all the required trainings, but with a heavy emphasis on safety.
